

DICOM products can be customized according to customer needs.

※ PrintSCU, etc can be like PrintLayout configured to the program.

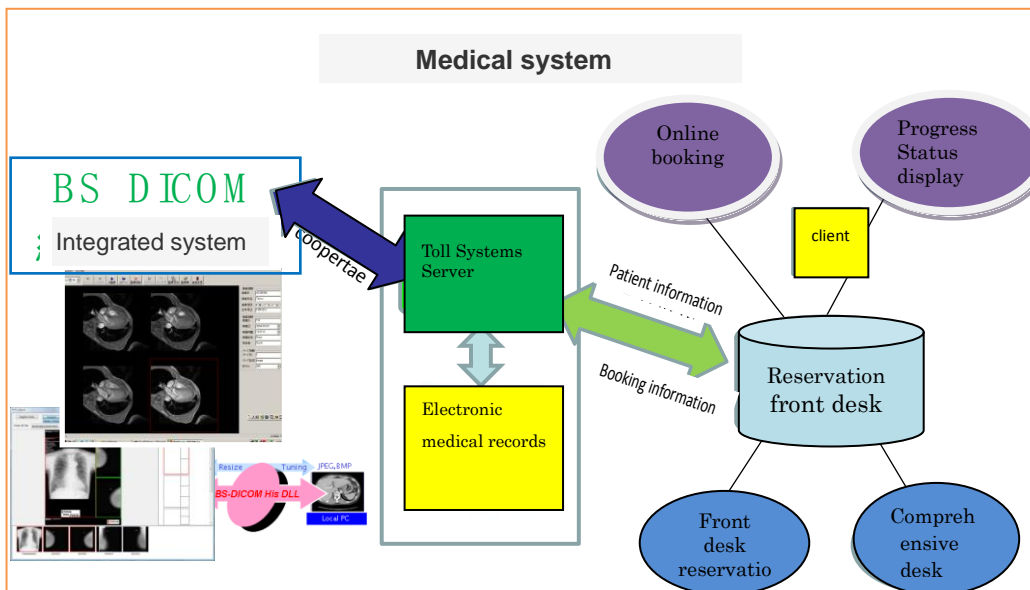

Configuration Example

DICOM Printing system

Using this software system, give Mammo portrait of CR device that (as the output of DICOM format to)medical device company producing to add margins, and then output to drive the printer a film produced by (DRYPIX series).

Development

The proposal of the medical system

Our proposal is:BS DICOM systems and electronic medical records / computer charge system combined into the medical system.
